

# Siphonaptera From Within

## Through the Eyes of the Dead

The ancient virus soars through a carrion breeze  
Engulfing regions with severe sickness

Advanced medical services infrastructure fail  
Scientist desperately search for a countermeasure  
Deranged epidemic  
Puzzled with no solution

Disease, diabolical pandemic

Genetic analysis is futile  
For xenopsylla has evolved  
Immune systems shut down  
Earth becomes frail

This is our end

Plague of morbidity continues to depopulate.....disease has every right to infect  
A vile agenda to rid this world of the humble and pure  
A second third of the world is lost  
Daily survival becomes fortune

The infected are quickly forsaken then killed  
Pestilent masses are bombed

Nuclear fallout complicates the dreadful catastrophe  
Leaving only thousands spread throughout the earth

Widespread carnage  
Ravaging the planet  
Brother deserts brother  
This was my dream

This was my dream  
This was my dream  
This is my dream  
This is my dream

Human extinction  
Nearing completion

This was my dream  
This is my dream

This is our end
