

Into the fire

Throw The Fight

Just take a second, just take time
To realize that this just might
Be the best thing that we've ever really had
My hands shaking and my heart is racing
My body's numb as you're replacing me with him
The pain sets in

Into the fire (is where your picture burns)
Our love won't die (because we'll never learn)
Into the fire is where your picture burns

I'm at the edge, I don't know why
I'm about to jump and say goodbye
To everyone I've ever hurt
I've finally got what I deserve

Take a step now I'm free falling
To the end I'm calling out your name
But it's too late

Into the fire (is where your picture burns)
Our love won't die (because we'll never learn)
Into the fire is where your picture burns

I'm deaf to everything
That reminds me, that reminds me
I'll make you feel my pain
I'll make you feel my shame

Into the fire (is where your picture burns)
Our love won't die
Into the fire is where your picture burns

I wait alone with my eyes closed
I dream about those nights with you
I swear I gave my soul to you
I swear I gave my soul

Into the fire (is where your picture burns)
Our love won't die
Into the fire is where your picture burns
Our love won't die (because we'll never learn)
Into the fire
Our love won't die

You'll never learn!
That's why your picture burns!
