

Fight Or Die

Throwdown

The life I knew is but a memory, a better time corroded by a harsh reality
What have we let ourselves become?
A mercenary culture doomed to burn
So tell me what it's gonna be when fire lights your city's streets

Fight or die
It's your only choice to survive
Fight or die
When fear and chaos collide
What the fuck has this world come to?
I just don't know
What the fuck are you gonna do when the lights go black?

Your rights are under siege, under attack
And soon you'll pay the price for your complacency with your life

Fight or die
It's your only choice to survive
Fight or die
When fear and chaos collide
What the fuck has the world come to?
I just don't know
What the fuck are you gonna do when lights go black?
It's time we fired back

Fight or die
It's your only choice to survive
Fight or die
When fear and chaos collide
Fight or die
