

Think About It

Thundamentals

When all you can do is feel like everyone else
Just know, you're not alone, you're just by yourself
And it's all that I think about, think about

I wrote your name as a tattoo on my mind
Tryna fill the void in my chest
I bang on it like a baboon
It's like I'm tryna get that noise in my head
Tellin' me your bad news, am I blind
Am I just a boy in your bed
But I ain't stressin' on your taboos, it's alright
I'm just tryna see the poise in your step
We go dancin' in the moonlight
When everything is feeling ok
And I don't really know the answer
Why I'm fascinated by you
Most days she wanna keep me on the side, that's cool
It doesn't happen every day, that's fine
But don't you wanna play that suit
I'm already on the way, cab ride

When all you can do is feel like everyone else
Just know, you're not alone, you're just by yourself
And it's all that I think about, think about
Call in on me, you can call me on the telephone
When you feel like everyone else, just know
That you're all that I think about, think about

You got me living like a vampire
Cause I only see you when the sun is down
We get lit like campfire wood
But one day we're gonna run this town
Maybe we could build an empire, cool
But first you gotta take that dive
You want something to believe in, true
Believe me, baby so do I
So we party on the weekend
Show me yours, I'll show you mine
Skinny dipping in the deep end
We just tryna stay afloat tonight
We don't ever wanna pretend
Really we already both knew
Why you only call me when you're peakin'
I'm your number one go-to guy

When all you can do is feel like everyone else
Just know, you're not alone, you're just by yourself
And it's all that I think about, think about
Call in on me, you can call me on the telephone
When you feel like everyone else, just know
That you're all that I think about, think about

We don't wanna fight
We're just gonna waste time
They got no clue 'bout what we're doing
So til then we ain't gonna lie
They call us foolish, but we fooled them

And maybe that's why, why, why
I can be your go-to guy

When all you can do is feel like everyone else
Just know, you're not alone, you're just by yourself
And it's all that I think about, think about
Call in on me, you can call me on the telephone
When you feel like everyone else, just know
That you're all that I think about, think about
