

## Feeding The Flame

Thunder

If I could travel back to yesterday  
There are some things I would like to change  
I might of hurt some people along the way  
But I've been hurt myself just the same  
But now if I hear talk behind my back  
It's fuel to the fire, keeps me on the track I know  
They won't cause me no pain  
They're just feeding the flame

I hear people cry and people moan  
About the hand that they've been dealt  
And I know luck can be so hard sometimes  
But you got to make it happen for yourself  
Some are bitter, some will criticize  
And when they're right in your face  
They can be so nice, oh no  
Don't let them drive you insane  
They're just feeding the flame

They're just feeding the flame  
Gimme fuel to burn, oh baby  
They're only feeding the flame  
They ain't never gonna learn  
Til their bridges start to burn

But now if I hear talk behind my back  
It's fuel to the fire, keeps me on the track  
They won't cause me no pain  
They're just feeding the flame

They're just feeding the flame  
Gimme fuel to burn, oh baby  
They're only feeding the flame  
They ain't never gonna learn  
Til their bridges start to burn
