

## Face in the Mirror

Thunderstone

Time after time  
we hear the world's cry  
No matter how we try  
we're always one step behind  
This is the way we live.  
These are the hands that give  
There's a face in the mirror  
The eyes of a stranger

You can burn yourself  
if you fly too close to the sun that shines so bright  
You can turn away  
or decide to stay where the darkness takes over the light

We are weakened by the virus  
And there's nothing we can feel  
If this will be our last song?  
I welcome you to the real  
So this is the way we live  
These are the hands that give  
There's a face in the mirror  
And mirror never lies
