

## War Is Mine

## Thy Disease

War - we believe in  
Holy, fucking war  
Sons of desert, living bombs

Smothered for so long  
Human's truth must be shown  
Mutilated carcasses  
Total domination  
And nothing what blessed  
Won't be passed over

Before your end  
Let the harvest be fulfilled  
Cause we love death

Blood is destination  
And ultimate gift  
Sick visions, smell of death  
We moved demons  
From the depths  
Of human hell

Just defeat Jehovah  
And let the Jesus be killed  
Kill also the other  
And our world will be free
