## Without Judgement

## **Thy Disease**

Guilty until... proven innocent We condemn your soul... and fate Never mind... the possibilities Too busy for logic... or to calculate

Take part in! a diminishing breed Where complex! turns to simplicity ...When pain is acknowledged Frivolous calculations will be abolished

Without judgement what would we do?
We would be forced to look
At ourselves emerged in lost time
Assuming what may be
Without judgement perception would
Increase a million times

Distracted by... the imagination
That experiments... with ease
If you could taste it, it might be addictive
Where life will crush... those who defy

Take part in! a diminishing breed Where complex! turns to simplicity ...When pain is acknowledged Frivolous calculations will be abolished

Without judgement what would we do?
We would be forced to look
At ourselves emerged in lost time
Assuming what may be
Without judgement perception would
Increase a million times
