## When All Hope Is Gone

Wait a minute, step back Get a little closer We're just a little off track trying to get it all done I think I'll pour another glass Im feeling kind of sober Were just a little off track trying to get it all done

On it goes And still nobody knows What we're all fighting for Soon when all hope is gone We'll find love

Wait a minute, step back See what's going over People watching our backs protect us from each other It's just another way of sitting back and blaming others We're just a little off track trying to get it all done

On it goes And still nobody knows What we're all fighting for Soon when all hope is gone We'll find love **Tiago lorc**
