

Perfect Chemistry

Tiffany Alvord

When I'm with you, I'm bout to explode
Cause the way I feel is more than my heart can hold
I smile, and giggle round you, without even knowing
I try to hide it but, my love keeps showing

And I'm trying not to fall, but I have no choice
I'm falling in love
Yes, I'm trying not to fall, but it's just too late
I'm falling in love

Cause you complete my heart, we're a perfect harmony
And you, are my blanket of security
And you, are the music to my melody
And we, yes you + me, create the perfect, the perfect, chemistry

With you, things are different than before
You make me feel unlike any other
Your eyes, do more than hypnotize me
They make me feel of your sincerity

And I'm trying not to fall, but I have no choice
I'm falling in love
Yes, I'm trying not to fall, but it's just too late
I'm falling in love

Cause you complete my heart, we're a perfect harmony
And you, are my blanket of security
And you, are the music to my melody
And we, yes you + me, create the perfect, the perfect, chemistry

& I have, wanted just one guy, to show me that they
aren't all the same
& you are, that one guy for me, I wanna feel this way forever,
for eternity
& you have showed me love is true and no one understands,
me better than you do

Cause you complete my heart, we're a perfect harmony
And you, are my blanket of security
And you, are the music to my melody
And yes, me + you create the perfect, the perfect
Cause you complete my heart, we're a perfect harmony
And you, are my blanket of security
And you, are the music to my melody
And we, yes you + me, create the perfect, the perfect, chemistry
