

# You & Me

Tiffany Darwish

Gimme one reason why you look so sad  
A heart like yours wasn't made for that  
Gimme your hand, I'll pull you through  
Gimme some time and I swear to you  
Every night  
I'll be so close  
Every night  
Hey don't you know

You and me  
Were made to be in love  
Don't let them tear us apart  
You and me  
Were made for love

Baby you know it's a matter of fact  
I can't stand by when you feel like that  
Baby, you know when it comes to love  
I got time and that's time enough  
Every night  
I'll be so close  
Every night  
Hey don't you know

You and me  
Were made to be in love  
Don't let them tear us apart  
You and me  
You're all I ever need  
Look in my eyes can't you see?  
You and me were made for love

You can lock your door  
You can live alone  
You can dim your lights  
Disconnect the phone  
You can run  
But you will live in a lie

You and me  
Were made to be in love

You and me  
Were made to be in love  
Don't let them tear us apart  
You and me  
You're all I ever need  
Look in my eyes can't you see?  
You and me  
Were made to be in love  
Don't let them tear us apart  
You and me  
You're all I ever need  
Look in my eyes can't you see?  
You and me  
Were made to be in love  
Don't let them tear us apart

You and me  
You're all I ever need
