Make My Day

Giardina Tiffany

World won't wait So I make my way downstairs

Mom freaks out
Please don't shout
I still have to dry my hair

I've been up all night
Just thinking you're the one
Who's in my dreams

My heart just keeps on jumping When I think what we could be

Just go ahead and make my day You make the world just melt away When things go wrong and skies are gray Just make my day, make my day

Second bell
Show and tell
At my locker down the hall

Heart in throat See your note And it turns out after all

You've been up all night Just thinking I'm the one Who's in your dreams

Your heart just keeps on thumping When you think what we could be

Just go ahead and make my day You make the world just melt away When things go wrong and skies are gray You just make my day, make my day

We're holding hands
We're walking home
We don't know what to say

But later on I read your text You made my day

Here we go! Ha!

Just go ahead and make my day You make the world just melt away When things go wrong and skies are gray You just make my day

Just go ahead and make my day
You make the world just melt away

When things go wrong and skies are gray You just make my day, make my day You just make my day
