

## Moonlite Dreams

Tiger Army

autumn creeps in again. red sky at night, devil's delight. i see your face, it's haunting me. promises withered like spring gone by. i think about her... my mistress is despair, i need her. i think about it... you see she's always there and i'm haunted by moonlight dreams... poison tears and purple heart. oh darling, can't you see my sanity- is falling apart. fall apart. it's all coming down tonight. see futures passed so clearly. which pair of eyes will do me in? which dagger dipped in poison? i think about her... my mistress is despair, i need her. i think about it... you see she's always there and i'm haunted by moonlight dreams... poison tears and purple heart. oh darling, can't you see my sanity- is falling apart. fall apart (i loved her). falling apart, fall apart (she's gone). falling apart, fall apart (into the night).
