Angels Never Call

I used to watch her sleep an angel on vacation I fell in love so deep far too far to mention She looked just like a thousand stars When they came out at night But when I looked inside her heart I found it locked up tight

Oh angels never help you 'Cause angels always fall

She smoked a cigarette It only blurred my vision I couldn't help but stay With my first impression I'm wondering with every breath What caused my fall from grace I guess I beat myself to death Against her lovely face

Oh angels never help you 'Cause angels always fall

And angels (it's simply that I never knew her) Sometimes kiss you (wish to God that I had known) Oh but angels (but everything that I remember) Never call (is gone)

Oh angels (it's simply that I never knew her) Never help you (wish to God that I had known) Cause angels (but everything that I remember) Always fall (is gone)

And angels (it's simply that I never knew her) Sometimes kiss you (wish to God that I had known) Oh but angels (but everything that I remember) Never call (is gone)

I used to watch her sleep - an angel on vacation

'Til Tuesday
