

## Lipstick Flavored Cherries

Tila Tequila

Would you be mad if you saw me kiss another guy?  
You know I want you but you're just a little bit too shy.  
When we make love, I've been thinkin about someone else.  
I don't mean to be this way but we're just not the same.

I know you got the feelin about everything I say is just a lie,  
You know I got you whipped and I,  
Don't really give a damn what people say.  
They all pretend to be your friend but in the end they hit on me,  
Kiss me, Just one last time  
Because I will just be a memory.

Do you really want to know what I did last night?  
I met a boy at the club and he felt me up right.  
Ran his fingers through my hair and touched me everywhere.  
Now that I have told you, do you still want me here?

I know you got the feelin about everything I say is just a lie,  
You know I got you whipped and I,  
Don't really give a damn what people say.  
They all pretend to be your friend but in the end they hit on me,  
Kiss me, Just one last time  
Because I will just be a memory.  
Memory, Kiss me, Kiss me,  
Kiss me, Because I will just be a memory.

I know you got the feelin about everything I say is just a lie,  
You know I got you whipped and I,  
Don't really give a damn what people say.  
They all pretend to be your friend but in the end they hit on me,  
Kiss me, Just one last time  
Because I will just be a memory.
