Watch the Wind Blow By

Tim McGraw

Creek goes rippling by
I've been barefoot and all day with my baby
Brown leaves have started falling
Leading the way

I like it best just like this Doing nothing all the way So let's lay down in the tall grass Dreaming away

And all I wanna do is let it be and be with you And watch the wind blow by And all I wanna see is you and me go on forever Like the clear blue sky Slowly, there's only You and I And all I want to do is watch the wind blow by

Girl, you know you told me not so long ago To let it come, then let it pass And all your troubles and your sorrows They won't last

So let me kiss you now, little darling Beneath this autumn moon Cold wind, another season Will be here soon

And all I wanna do is let it be and be with you And watch the wind blow by And all I wanna see is you and me go on forever Like the clear blue sky Slowly, there's only You and I And all I want to do is watch the wind blow by
