

Shape The World

Tim McMorris

Give, because you ought to and
Love because it right
Live, the way that life was meant to be lived

Oh and smile, because it makes you feel good and
Laugh, so that the world gets brighter
Cry, but make it tears of joy as time goes by

Yeah, hold your hands up, and be care free
Go and make someone's day and let them see
That hope is still here, that hope is still near, oh and

Be the change in the world that you want to see
And together we could change the course of history
Oh it's true, but only you can change you, yeah

I want to shape the world, into a place
Where freedom reigns in the human race
A world where we all get along
And work to right all that is wrong

I want to shape the world, into a place
Where smiles are there from face to face
And safety's found in every nation
Cause peace is brought to all creation
Let's shape our world
But it all start with me

Hope, no never give up, and
Press, when the times get tough
And know, that all things are possible if you believe, yeah

Shine, you gotta shine real bright
Cause' it helps to keep ya going till' your dreams take flight
And give all you can, from sunrise right through to the night

You gotta fight, fight and keep your head up
Have joy, in the things that go right
Search, for the things that really matter, go and explore, oh

Dance, like you never danced before
Share, you got to give if you want more
Be free, and come sing along with me, oh

I want to shape the world, into a place
Where freedom reigns in the human race
A world where we all get along
And work to right all that is wrong

I want to shape the world, into a place
Where smiles are there from face to face
And safety's found in every nation
Cause peace is brought to all creation
Let's shape our world
But it all start with me

Let's shape the world, into a place

Where freedom reigns in the human race
A world where we all get along
And work to right all that is wrong

I want to shape the world, into a place
Where smiles are there from face to face
And safety's found in every nation
Cause peace is brought to all creation
Let's shape our world
But it all start with me
