

# We Can Change The World

Tim McMorris

Turning quickly, hand over hand, the clock is ticking, time is moving fast  
Reviewing all the lessons we have learned, from the mistakes lost in the past  
Miscommunication leading us into a place where there lies strife  
Why do we still tolerate, the things like greed and hate that rule this life

When

We can change the world, we can change the world  
We can change it's course, within a single generation  
Standing up for freedom, spreading hope, nation to nation

We can change the world, we can change the world  
It doesn't have to be the way it is, or how it's been  
Instead of looking out we need to turn and look within  
We can change the world

I dream of a world where peace is king, and all good things are in supply  
Reaching to the heavens, hands up high, I do my best to grasp the sky  
Observation, education, inspiration, revolutionize  
A new beginning comes as we embrace, love without compromise

Then We can change the world, we can change the world  
We can change it's course, within a single generation  
Standing up for freedom, spreading hope, nation to nation  
We can change the world, we can change the world

It doesn't have to be the way it is, or how it's been  
Instead of looking out we need to turn and look within  
We can change the world
