Out In The Darkness

Tim O'Brien

Out in the darkness, out in the night I see you standing there I want to guide you into the light Show you I really care

It's hard to show the way I feel
On this side of the line
How can I show you my love is real
It you can't see the sign

A little bit harder, we're gonna have to try A little bit farther, keep walking side by side A little bit stronger, we're gonna have to be A little bit longer, together we hold the key

Why do you hold back when I phone You never come around And when I'm with you I feel so alone You never make a sound

A little bit harder, we're gonna have to try A little bit farther, keep walking side by side A little bit stronger, we're gonna have to be A little bit longer, together we hold the key

Out in the darkness, out in the night I see you standing there I want to guide you into the light Show you I really care
