

# One Night

Timeflies

Where are we now  
I can't come down, I'm dreaming  
They scream so loud  
I don't know how I'm breathing

I need one night to get away from it all  
I need one chance, don't let me fall  
I need one life to get lost in the sound  
So for one night, I don't wanna be found  
I don't wanna be found

I need one night, one night  
I don't wanna be found

So far from real  
But I want to feel you near me  
We're moving still  
And I wonder will you hear me

I need one night to get away from it all  
I need one chance, don't let me fall  
I need one life to get lost in the sound  
So for one night, I don't wanna be found  
I don't wanna be found

I need one night, one night  
I don't wanna be found

My heart's beating too fast  
We wouldn't want it to slow  
Still we can make it to last  
We're perfectly outta control  
One touch with that one man  
With this one stage and this one mic  
With our one heart and this one world  
So what we need is this one night

I need one night to get away from it all  
I need one chance, don't let me fall  
I need one life to get lost in the sound  
So for one night, I don't wanna be found

I need one night, I'm dreaming  
I need one night  
I need one, one, one, one  
One night, I'm dreaming  
I need one night, one night  
I don't wanna be found
