Killin' Time

Tina Cousins

If I could get over you Then I could get away from here It's such a lonely place I only have myself to blame And if I make it through The wasteland of my mind Maybe then I'll find a way To find a brighter day But I'm just killin' time Since you went away All I have are memories And every day they fade I'm the love you didn't want The love that couldn't reach I reminisce on every kiss And I'm just killin' time Thought that I could change your mind But some things can never be And so our story ends If only we could be friends And though you're far away from home I feel every breath you take You're livin' deep inside of me And I just can't be freed But I'm just killin' time Since you went away All I have are memories And every day they fade I'm the love you didn't want The love that couldn't reach I reminisce on every kiss And I'm just killin' time Where are you now Where are you now I'm just killin' time Since you went away All I have are memories And every day they fade I'm the love you didn't want The love that couldn't reach I reminisce on every kiss And I'm just killin' time
