

# Cold Sweat

Tinashe

I like being alone  
I'm out here, spend plenty of time on your own  
Cause the city ain't kind, other people who sign  
I for you can't take no  
Complacent  
This ain't a place to be making friends they all got agendas  
These eyes on your back, and on your neck  
Making up in, looking for your tits, did you see?  
Seem so thirsty, smell fresh meat in the air  
So the real test, after breakfast  
We'll see who's to be here

This pressure ain't for everybody  
Why you ain't so heavy on my body, body

Spine, shivers  
Eyes, met  
Head, in it  
Heart, set  
Cold, on my mind, yeah  
Ice dripping, cold sweat  
Ice, Ice dripping, cold sweat  
Ice dripping, cold sweat  
Ice, Ice dripping, cold sweat  
Ice dripping, cold sweat

Can't choose to sit, you wish, with a friend  
Always got to co-sign, everything's a ten  
Damn I hate a yes man  
I know while this buzzing gotta be ringing in your eer  
One thing I forgotten, you was always here  
Tell me where was you last year?  
And I doubt you was last here  
It's your last year

This pressure ain't for everybody  
Why you ain't so heavy on my body, body

Spine, shivers  
Eyes, met  
Head, in it  
Heart, set  
Cold, on my mind, yeah  
Ice dripping, cold sweat  
Ice, Ice dripping, cold sweat  
Ice dripping, cold sweat  
Ice, Ice dripping, cold sweat  
Ice dripping, cold sweat

No no no no

Wish it was goodbye  
Time for me to accept a few with my extra time  
Like to handle with the lights on all night  
Don't drip, everything... I touch is fire  
The summers they ain't the same

These lovers they ain't the game  
These feeling, they don't mean nothing  
These ceilings can keep the pain  
Explanations you say I deserve it  
Why after all this time I'm finally worth it  
Ain't it funny, a power comes with money  
And how now I'm out here poppin  
They come back like they're an option  
Man this shit is hella scummy  
They claiming that they love me  
Cause they realise that my time is finally coming  
They know it  
Cause my night is your's  
Moon is high  
The stars are all, alligned
