

Don't Ever Get Tired

Tindersticks

Learn to live, learn to love
Learn to feel happy
Learn to recognize
Where the joy lies

Learn to sing, learn to move
Your foot tapping on the side
You've been watching them
For all of your life

And don't let those moments
Pass you by
You set your slightest step
To the inside

It's another year
You're still around
Can I touch you to make sure
How you tire of waiting for me

Don't ever get tired
Of waiting for me
I've been wanting to
All this time
You set your slightest step
To the inside

I've been wanting to
All this time
You set your slightest step
To the inside
