

Show Me Everything

Tindersticks

Complexities Treacheries
We watch through glass
We see nothing
Latex on the fingertips
We touch through glass
We feel nothing
Out of care, out of all
We're scattered like stones

(Show me ,show me)

Out of mess, out of my tents
We could take these stones, build something
We could try forever
To try and see
We survive alone

Show me everything
(Show me, show me)
Show me everything

So many new moons, two colours surround
So many new stars to guide us
But we see

You show me everything thing we cared for
Back together, separate
Take these stones, build something
To find a wall and get rid of this glass we believe we
taste
Everything we could have had
Everything that belongs to us
(Show me, show me
Would save that girl, angry
Take these stones, throw something
(Got to find a way to save me)
Hesitate
The price that holds the very air we breathe
There's you, you show me everything I cared for
Yea, you

You show me everything
You showed me, you showed me
You showed me everything, everything
You showed me, you showed me
You showed me, you showed me everything, everything
(Show me, show me)
Show me everything
(Show me, show me...)
