

This Fire Of Autumn

Tindersticks

Everything we cannot keep
The rains to be left behind
Meet you in the crowded room
This did get the storm

Don't want nothing that don't belong to us
Don't want nothing we can live without

In this fire of autumn
This fire of autumn
This fire of autumn
This fire of autumn

Out of words we never say
Could remain an indifferent
We leave them to the flames
With everything you can't forget

In this fire of autumn
This fire of autumn
This fire of autumn
This fire, this fire

All my love grow selfishly
Eventually come to reject
What it there left to give?
But clench your fist on the gentle life

In this fire of autumn
This fire of autumn
This fire of autumn
This fire of autumn
This fire

Don't want nothing we can live without
Don't want nothing that don't belong to us

Just throw me as I'm burdened
Hold me as I scream

In this fire of autumn
This fire of autumn
This fire of autumn
This fire, this fire, this fire
