Waiting For The Moon

Tindersticks

We know this place Where we are doesn?t matter We know this place We?ve been here before

The stars are out Waiting for the moon The stars are out Waiting for us

Pull the blanket now
Creep down the stairs
Don?t wake the little ones
The lazy cats, the mice are in their homes

The stars are out Waiting for the moon The stars are out Waiting for us

Ease this raging mind, this raging love Sometimes it feels like a knife But not tonight Sometimes it turns like a knife in me, not tonight

The stars are out Waiting for the moon The stars are out Waiting for us
