

# Karma

Tiziano Ferro

When the universe connects us  
I know this is karma

Stare at the sky, can't get out of my bed  
There's a shadow circling my head  
Where's love, your love?

In another life did I play this game  
Leaving me alone with an empty frame  
I fear the worst in me  
But you know the best in me

'Cause you see, when I'm honest with honesty  
I will stumble through the darkness  
Till we see the morning

Is this karma, can you hear me  
My heart is singin'  
Everything inside I wanna say  
I think about you every single day  
Is this karma, come and dance  
Like we did before I lost you,  
This is karma  
My heart is singin'  
Everything inside I wanna say  
Every step I'm taking day by day  
When the universe connects us  
I know this is karma

I can't get the image of you out of my mind  
The edges of your body pushing up against me  
Breathing, breathing  
There is a silence in my beating heart  
A cause and effect that we can't discard  
Is all of love a ploy, an energy decoy

'Cause you see, if I'm honest with honesty  
That means crashing through the mirror  
Just to know what love is

Is this karma, can you hear me  
My heart is singin'  
Everything inside I wanna say  
I think about you every single day  
Is this karma, come and dance  
Like we did before I lost you,  
This is karma  
My heart is singin'  
Everything inside I wanna say  
Every step I'm taking day by day  
When the universe connects us  
I know this is karma

Love is karma, come and dance  
Like we did before I lost you
