

# Crash Here Tonight

Toby Keith

I almost said I love you  
Could I really be that kind of guy  
See one candle burning in your eye  
And watch my heart fill up with butterflies

I almost said I need you  
Girl I shouldn't go there anymore  
Act like I never been in love before  
You probably think it's my first time

Is this what love's all about  
Am I getting in too deep  
Wouldn't want to freak you out  
Make a promise I can't keep

So close your eyes and hum along  
And I'll sing you one more love song  
If everything is still alright  
Why don't you just crash here tonight

Close your eyes and hum along  
And I'll sing you one more love song  
If everything is still alright  
Why don't you just crash here tonight

Girl if everything is still alright  
Why don't you just crash here tonight
