

# It's All Good

Toby Keith

Mother earth has changed since i was a child  
The east is a beast and the west is really wild  
And the headlines say the end looks grim  
And the future don't look so bright

You can't even open your mailbox, you can't take the plane  
And everybody 'lookin' for somebody to blame  
I think I'm gonna let the president  
Save this ol' world tonight

I'll light us a fire  
And she'll turn off the news  
We'll open a cold one and shake these blues

It's all good  
It's alright  
I'm gonna sit here with my baby all night  
And let the troubles of this world  
Roll on by us like they should  
It's all cool  
It's ok  
We've got everything going our way  
Can't complain if we're alright  
It's all good

I'm just a ragular Joe, with a beautiful girl  
Just gettin by in a day-to-day world  
We ain't got a lot, but we don't need anything

Covered in kisses, surrounded by love  
Showered with blessings from up above  
When you'r sittin' on top of the world, man we got everything

we live out here in the country  
Where the workin' class do  
We've got our health and our happiness too

It's all good  
It's alright  
I'm gonna sit here with my baby all night  
And let the troubles of this world  
Roll on by us like they should  
It's all cool  
It's ok  
We've got everything going our way  
Can't complain if we're alright  
It's all good

No can't complain 'cause we're alright  
And it's all good
