

Something U

Toby Lightman

Just a boy and a girl
And a day that will change both of our worlds
I can't, shake this spell
Of a love that runs deeper than diamonds and pearls

You know when you know
I've been waiting for you, all of my life
I swear on my heart
I'm gonna love you forever and we will never part

Something old, something new, something borrowed, something blue
But all I need is something you

Got my gown, got my veil
Daddy's holding my hand
Flowers in my hair
Two rings, bands of gold
With you my darling, I wanna grow old
To have and to hold
For better or worse, our love will grow strong
I do, love you
Now they're playing our song baby, playing our song

Something old, something new, something borrowed, something blue
But all I need is something you
