## **Little Red Lights**

**Todd Rundgren** 

You got to ease into line, boy But once I hit the open road I'll be sailing off and on my own

You and me in my GT With those little red lights in front of me When I go to heaven, you know that's where I want to be

Would you please fill it up, boy I'd like to stop and catch myself a bite But I sure hate to leave the road tonight

You and me in my GT With those little red lights in front of me When I go to heaven, you know that's where I want to be Woah

And when I'm racing the clock You know that I would die or kill somebody Just to move this hunk of steel one more block

You and me in my GT With those little red lights in front of me When I go to heaven, you know that's where I want to be

I think I see a little red light in my rear view mirror
