

# Automatic

Tokio Hotel

Automatic, automatic

You're automatic  
And your heart's like an engine  
I die with every beat  
You're automatic  
And your voice is electric  
Why do I still believe?

It's automatic  
Everywhere in your letter  
A lie that makes me bleed  
It's automatic  
When you say things get better  
But they never [unverified]

There's no real love in you  
There's no real love in you  
There's no real love in you  
Why do I keep loving you

It's automatic  
Counting cars on a crossroad  
They come and go like you  
It's automatic  
Watching faces I don't know  
Erase the face of you

It's automatic, systematic  
So traumatic, you're automatic

There's no real love in you  
There's no real love in you  
There's no real love in you  
Why do I keep loving you

Automatic, automatic  
Automatic, automatic

Each step you make  
Each breath you take  
Your heart, your soul  
Remote-controlled  
This life is so sick  
You're automatic to me

(Love in you, love in you)  
There's no real love in you  
There's no real love in you

There's no real love in you  
There's no real love in you  
There's no real love in you  
Why do I keep loving you?

Automatic  
(There's no real)

Automatic  
(Love in you)

Automatic  
(Why do I)  
Automatic  
(Keep loving you?)  
Automatic
