

Do you ever think of me at night?
Do I ever cross your mind?
Do you remember the sky in our lungs
Or did you make our
Memories come undone

If you really, if you really feel the same just let me know
I keep dreaming without sleeping in this bittersweet afterglow

I should have never told you
That you were the only one
I should have never told you
That you're the reason for this song

Scars were bleeding
Hearts were beating
Life was freezing
When you were leaving

I miss your feeling
I miss you every single day
If you can hear me
Come back and stay

I wanna blame the sky for
Everytime I think of you
I wanna blame every goodbye that
Made me drown into my blues

If you really, if you really feel the same just let me know
I keep dreaming without sleeping in this bittersweet afterglow

I should have never told you
That you were the only one
I should have never told you
That you're the reason for this song

Scars were bleeding
Hearts were beating
Life was freezing
When you were leaving

No fight I wouldn't have fought for you
But I can't love you anymore
Cause you
You left to the stars
My world fell apart
Now that you live in the dark

Scars were bleeding
Hearts were beating
Life was freezing
When you were leaving
