

Gas and blood  
Is all I've got  
In you I trust  
The final exit's  
Passing by  
The wheels run free  
Under me  
It's you I feel  
A million sparks are falling down  
I turn the wheel around

Kiss me goodbye  
Into the light  
Like a phantom rider  
I'm dying tonight  
So dark and cold  
I drive alone  
Like a phantom rider  
Can't make it all on my own

Promises  
I scratched so deep  
In your empty seat  
The sky is turning upside down  
I turn the wheel around  
I don't know your name  
But still believe  
Now it's the time  
For you and me  
Time for you and me

Now I'm here  
No more fears  
Angel, don't you cry  
I'll meet you on the other side

Goodbye  
Into the light  
Like a phantom rider  
I'm dying tonight  
So dark and cold  
I drive alone  
Like a phantom rider  
Can't make it all on my own  
Hey!  
I'm here with you  
I am here, here  
Leave me alone  
Phantom rider  
Always die on their own
