

# What If

## Tokio Hotel

I am down for something  
Come pick me up in your car  
Don't let me down for nothing  
I wanna know who you are  
And if you don't do something  
I wanna piece of your heart  
Come let's just not do anything  
Get me a piece of the stars

We're highest far, nowhere to be  
No second chance in this galaxy  
It could be you, it could be me  
So let us be  
You and I!

What If I would love you till' the end?  
You would never be alone again  
(Huh uh)

What if I would love you till' the end?  
(What if? What if? What if?)

You would never be alone again  
(What if? What if baby?)

It's why I've yelled and it's nothing  
Let's jump back in the car  
We're getting lost in some new place  
At least we know who we are

We're highest far, nowhere to be  
No second chance in this galaxy  
It could be you, it could be me  
So let us be  
You and I!

What if I would love you till' the end?  
You would never be alone again  
(Huh uh)

What if I would love you till' the end?  
You would never be alone again  
(Huh uh)

What if I would love you till' the end?  
(What if? What if? What if?)

You would never be alone again  
(What if? What if baby?)

What if I would love you till' the end?  
(What if? What if? What if?)

You would never be alone again  
(What if? What if baby?)

What if baby?

What if I would love you till' the end?  
You would never be alone again  
(Huh uh)

What if I would love you till' the end?  
You would never be alone again  
(Huh uh)

What if I would love you till' the end?  
(What if? What if? What if?)

You would never be alone again  
(What if? What if baby?)

What if I would love you till' the end?  
(What if? What if? What if?)

You would never be alone again  
(What if? What if baby?)
