

Seen That Face

Tom Jones

I forgot how much it hurts, to see you cry
And just how inconcent the world seems when you smile
There was a little kiss in the back of the car
Looking right at me, his eyes spells with the stars
I felt so happy and so true
In that moment he remind me of you

I've seen that face looking back at me
It's like a mirror reflecting everything
A faded distant memory
Pulling at my heart

I wanna to protect to you, from any pain
Keep you close to me, so you will always feel safe
You know how much I love you, my sweet precious child
I would do anything, I'll walk trough fire
I see part of me in you,
And when you look at me it all come shinning trough
