

# Something For Your Head

Tom Jones

I'll be around, love is on our side  
I'll be around, love is on our side  
I'll be around, love is on our side  
I'll be around, love is on our side

Love is a two way street  
Didn't know what pain could bring  
Time has shown me the way  
Now I'm here for a brighter day  
For the first time in my life  
I can really see the light  
In hearts we both have found  
True love won't let us down

I'll be around, love is on our side  
I'll be around, love is on our side  
I'll be around, love is on our side  
I'll be around, love is on our side

Now more than anytime  
I need you in my life  
Joy will be our guide  
Keep the feeling rain or shine  
Tender moments fill my mind  
They remain 'til the end of time  
Clouds are gone, the skies are clear  
And a deeper love appears

I'll be around, love is on our side  
I'll be around, love is on our side  
I'll be around, love is on our side  
I'll be around, love is on our side

You know, we'll really outta stop this pretending  
And get back to the way we used to be  
Like the way we both wanna be, together

Love is on our side...
