

Something For Your Head

Tom Jones

I'll be around, love is on our side
I'll be around, love is on our side
I'll be around, love is on our side
I'll be around, love is on our side

Love is a two way street
Didn't know what pain could bring
Time has shown me the way
Now I'm here for a brighter day
For the first time in my life
I can really see the light
In hearts we both have found
True love won't let us down

I'll be around, love is on our side
I'll be around, love is on our side
I'll be around, love is on our side
I'll be around, love is on our side

Now more than anytime
I need you in my life
Joy will be our guide
Keep the feeling rain or shine
Tender moments fill my mind
They remain 'til the end of time
Clouds are gone, the skies are clear
And a deeper love appears

I'll be around, love is on our side
I'll be around, love is on our side
I'll be around, love is on our side
I'll be around, love is on our side

You know, we'll really outta stop this pretending
And get back to the way we used to be
Like the way we both wanna be, together

Love is on our side...
