Constellations

Tom Odell

You sat around the table, the candle lying low There's people all around us but they're leaving you alone You're telling me a story, some lover that you had Go on tell me now, tell me now, I think I'll understand

The piano man is playing some old melody It don't mean much to anyone what it does to you and me It's just some bitter love song that everybody's heard I'm gonna sing it out, sing it out, sing every single word

It's the same old constellation The stars up in the sky Yeah, I've got a feeling They're gonna look different tonight

Maybe I'm just crazy, maybe I'm just high Could kiss my lips a thousand times and they would never dry I don't know where you're going, but hey, never stray too far Cause I'll tell you now, I'll tell you now, I like you just the way you are

It's the same old constellation The stars up in the sky Yeah, I've got a feeling They're gonna look different tonight

It's the same old situation That you can have it with any guy But go on put your arms around me It's gonna be different tonight

Caroline, Caroline, I used to act so strong But I was just terrified, terrified, I feel it in my stomach mach Call 'em butterflies, butterflies, there's something in the air tonight They're gone, they're gone, they're gone

It's the same old constellation The stars up in the sky But you know I've got a feeling They're gonna look different tonight

It's the same old conversation You can have it anytime Go on put your arms around me baby It's gonna be different tonight
