Take a look
At what I've got
I can't promise
You a lot

But you and me And the road ahead

I can't save You from yourself You gotta want it All that's left

Is you and me And the road ahead

Wherever that wind might blow Wherever that river rolls You know I will go with you

Lookin' over
The mountain's crown
The water roars
And tumbles down

Like you and me And the road ahead

Wherever that wind might blow Wherever that river rolls You know I will go with you

Just you and me
And the road ahead
Just you and me
And the road ahead
