## **Frank's Song**

## **Tom Waits**

That woman will take you, that woman will break you That woman will make you something you've never seen That woman's got claws, that woman's got laws Now look out man, you're gonna loose your mind

I had a friend, his name was Frank He walked on the water and lord he sank We used to go stag, now he's got a hag It looks like Frank's got a new bag

That woman will take you, that woman will break you That woman will make you something you've never seen That woman's got claws, that woman's got laws Now look out Frank, you're gonna loose your mind

What happened to Frank, can happen to you Just find you a woman and watch what she'll do That woman will take you, that woman's gonna break you Look out man you're gonna loose, you're gonna loose your mind
