## **Cradle Song**

## Tomahawk

For whom there crows Spies over fields of rice Of water lotus stream A plant with dew

I will bring for you Little lovely dream A little lovely dream

Dear eyes good night, in a golden light The stars around you will bleed

For you I will press, soft caress

Little lovely dream

Sweet sweet shut your eyes The wild fireflies The wild fireflies dancing Through the fairy name

Straight from the poppy bowl It was for you I stole And just for you I stole A still little lovely dream

Hush demon baby Your time will soon come Your sleep will be broken By temper tantrum

Hush demon darlin' Rest while you may For strife comes a living And working with the day

Sleep momma dearest The tear upon my heart

Sleep, sleep my darling Sleep, sleep sleep on Sleep, sleep my darling Sleep, sleep, sleep on

I have brought for you A little lovely dream A little lovely dream

When dawn lights the skies Open my eyes
