

## Time To Know

Tomáš Bezdeda

Colours in the trees are  
birds and the bees are making yeah  
We just gonna make it  
even that the world can take us down

You will always be there  
You can always read between the lines  
I know what I want now  
always make me smile  
There is a time to know  
what we all want  
There is a time to show  
That we really care

Got often no feeling  
Is it time for healing and arm us all  
Gotta take all chances  
Gotta take the chance now and then fall

You will always be there  
You can always read between the lines  
I know what I want now  
always make me smile  
There is a time to know  
what we all want  
There is a time to show  
That we really care  
There is a time to know  
what we all want  
There is a time - this is the time.  
And I want you.
