

I Love You

Tone Damli Aaberge

I have been looking for pieces of what we shattered
I have been touching the parts I could find together
And I am starting to see traces, baby.

I know you know I've been waiting for you to call me,
You know I know you got problems with say, I'm sorry,
That I am a step away from crazy, baby.

I love you, me and my heart have decided,
I love you, nothing worth doin' about it
Cause baby when I need you here to hold it all together,
I love you, me and my heart have been foughted,
She wont do anymore beating without you,
We need you, I love you.

You said somethings but I know they was said in anger,
And I don't wanna be mad at you any longer,
So I am drawing up an line now, baby.

And I have tried to be stronger, without you here,
But I got memories I cant erase, I keep on picturing your face,
so,
I stop pretending that I'm fine now, baby.

I love you, me and my heart have decided,
I love you, nothing worth doin' about it,
Cause baby when I need you here to hold it all together
I love you, me and my heart have been foughted,
She wont do anymore beating without you,
We need you, I love you.

I cant get it right at all, nothing works when you are gone,
I cant sleep at night without you here,
And it crazy I don't care, 'cause

I love you, me and my heart have decided,
I love you, nothing worth doin' about it,
Cause baby when I need you here to hold it all together
I love you, me and my heart have been foughted,
She wont do anymore beating without you,
We need you, I love you.
