We Belong

Gonzaga, Toni

I've tried to tell you So many times this feelings of mine But it's not that easy Letting you know How I love you so

Complete me, you complete me I've never felt this way Complete me, you complete me Like words and melody

Don't you know that we both belong, baby Don't you know that we will last forever Don't you know that we both belong I knew it from the start We belong

Hoping that someday For that hello, just a simple hello And maybe tomorrow I'm the reason you'll smile And you make my day

Don't you know that we both belong, baby Don't you know that we will last forever Don't you know that we both belong I knew it from the start We belong

Together, you're my shelter in the pouring rain I just hope that you will see You and me we belong

Don't you know that we both belong, baby Don't you know that we will last forever Don't you know that we both belong I knew it from the start We belong
