

# What Are The Chances?

Gonzaga, Toni

Everybody thought what everybody else have been thinking  
We'd never make it through  
We'd never see the light of day  
Cos everybody saw what everybody else have been seeking  
The love we have is doomed  
This love is just one big mistake

But all we did is follow our feelings  
And look at where it took us today

[Chorus:]

Who would have thought  
Who would have guessed  
What are the chances  
That we'd make it through  
After all the hurt  
This heart has ever had  
What are the chances  
I would still be standing here with you

Now everybody's saying what no one's ever said then about us  
They say they always knew  
That we were really meant to be  
But I don't really care what they say now about us  
As long as I'm with you  
As long as I got you with me

And all that matters now in this moment  
The rest can just fade away

[Repeat Chorus]

And now we've come this far  
I guess we're lucky, yes we are  
I guess we must have known  
That we had it from the start

[Repeat Chorus 2x]
