

Inhale, hold, release  
Forever bound in your net of safety  
And it's the most dangerous place I can be  
Like torture to me  
I long to taste life without boundaries  
And I'm not scared  
Just let me breathe my oxygen

Opening my eyes  
I am alive  
And I'm larger than life  
Just let me breathe my oxygen  
Leave the past behind  
I have arrived  
I will light up the sky  
If you let me breathe my oxygen  
My oxygen

Turning my face towards the sun  
Hair in the wind, down highway one  
I'm looking for sense of escape  
Naked I am liberated  
I'll never change  
I stare my fears in the face  
Cause I'm not scared  
Just let me breathe my oxygen

Opening my eyes  
I am alive  
And I'm larger than life  
Just let me breathe my oxygen  
Leave the past behind  
I have arrived  
I will light up the sky  
If you let me breathe my oxygen

Rules were made for us to break  
Chances meant for us to take  
And all I know I will forsake  
Determined to break away

Opening my eyes  
I am alive  
And I'm larger than life  
Just let me breathe my oxygen  
Leave the past behind  
I have arrived  
I will light up the sky  
If you let me breathe my oxygen  
My oxygen  
If you let me breathe my oxygen  
My oxygen  
Just let me breathe my oxygen
