## **Never Let Me Know**

**Tony Banks** 

The key is in the front door The clock is on the wall The coals are in the fireplace Nothing has moved at all But as you look around you Still nothings quite the same

The windows are cracked the curtains are torn Your life disappoints if you want to be free Hold me never let me know

Do you stand upon the station Or are you on the train Do you want to vanish Or could we begin again Do I just imagine Or is it really true?

You want to be free to be on your own To start a new life you want to leave me Hold me never let me know

Never let me know Never let the world we share together Tumble, be destroyed Never let me know Always keep our dreams and memories Cherished in your heart

On the road we travel Sometimes I feel I know You'd rather walk without me Please say it isn't so Just put your arms around me And never let me go

Without you the world would be cruel and cold It cannot be true that you want to be free Hold me never let me go

Put your arms around me never let me go
