

I Do Not Know A Day I Did Not Love You

Tony Bennett

I do not know a day I did not love you
I can't remember love not being there
The planting when the earth ran through your fingers
The harvest when the sun danced in your hair

I do not know a day, I did not need you
For sharing every moment that I spent
I needed you before I ever knew you
Before I knew what needing someone meant

And if we ever were to have tomorrow
One fact alone is full and filled with song
You will not know a day I do not love you
The way that I have loved you all our lives
