

Tired and awake
Write words you really mean without mistake
Push the pen until it doesn't work no more
It's empty outside the door

Partially insane
Roman candle come and guide me through the dark
I'll be walking through the horror I once knew
That wasn't really much

This isn't a long catastrophe
It's all just a passing phase you'll see
And though I am scared of the sun light
I'm not scared if you're the night

Blanketed and bruised
Stumblin' to find the light switch on the wall
If this feeling goes, I won't do it again
This time I swear it

This isn't a long catastrophe
It's all just a passing phase you'll see
And though I am scared of the sun light
I'm not scared if you're the night

I'm not scared if you're the night
I'm not scared if you're the night
I'm not scared if you're the night
I'm not scared if you're the night

I'm not scared if you're the night
I'm not scared if you're the night
I'm not scared if you're the night
I'm not scared if you're the night
